

## Cabling Solutions

Nova Networks Cabling is a full service network cabling contractor supplying network connectivity services throughout the National Capital region. Nova Networks Cabling Division staff has over 45 years experience in leading edge service to its customers. By maintaining its focus on the design and installation of structured cabling, Nova Networks Cabling Division remains one of the premier cabling contractors in the Ottawa.

### Areas of Expertise

Nova Networks Cabling Division has adopted a single point of contact style for delivering network-cabling services. These services cover total voice and data applications utilizing standards based cabling media such as CAT5e, CAT6 and fiber optics. Each individual project is assigned a project manager and a lead technician on site.

### Design Services

- Telecommunications Systems Design
- Project Management for medium to large projects
- Project Procurement for the supply of all materials and equipment from our extensive range of suppliers
- Contract negotiations with suppliers, contractors, building owners, managers and clients
- Plant surveys for the identification, documentation, clean-up and testing of existing installations
- Cable Plants
- Copper and Fiber Optic Cabling (residential, commercial, industrial)
- LAN, MAN, WAN and campus applications
- Industry leading, standardized copper and fiber optic
- Certified installation services
- Backbone and Horizontal applications
- Inside and outside plant applications in Industrial and Commercial environments

### Cabling Division Group

Design, installation and support of WAN/LAN systems, copper, fiber optic cable and networks ensures that both business and technical aspects of the network infrastructure are reviewed in detail before any recommendations are made. We collaborate with Canada's leading carriers, service providers, network equipment providers, and their affiliates, to provide best Network Cabling solutions for our customers.

### Quality Policy

Nova Networks Cabling's quality policy states: "Nova Networks Cabling is committed to providing quality service to its clients by ensuring that each and every client receives the products and services expected, reliably and consistently".

Nova Networks Cabling Division designs and installs the cabling systems and products in accordance with manufacturer's specifications and industry standards in order to ensure system integrity, performance and qualification for certification.
