# Message Archiving

## Overview

**NOVA**

 message archiving

**Nova and McAfee join forces to provide enterprise security and 24/7 support services.**

**“E-discovery today represents 35% of the total cost of litigation, and companies that fail to produce emails in a timely or appropriate manner face the risk of paying millions of dollars in sanctions and fines, not to mention loss of corporate reputation, lost revenue and embarrassment.”**

- OSTERMAN RESEARCH

Only a few short years ago, businesses never thought twice about storing email - it wasn't a concern because it wasn't the law. Today, as email volumes escalate, so is the need to safely store and retrieve these massive volumes of messages.

McAfee® Message Archiving is your answer to reducing email storage and management costs, satisfying eDiscovery and compliance needs, and ultimately protecting your business and employees.

### Get more archiving for less - less time, less money, less management

Store, search and retrieve. Although these are the fundamentals of our Message Archiving service, ours is a legal-grade, easy-to-use, fully-integrated and economical service that:

- Automatically and safely stores email for future review and eDiscovery
- Offers powerful, precise and rapid search functionality
- Replaces cumbersome, costly and unreliable tape backup
- Requires no hardware or software purchases

### Protection for your business reputation, your data and your employees

Using the McAfee Message Archiving service in combination with the McAfee® Email Defense Service, gives you confidence that your massive email volumes will be safely stored and easily searchable in any event, at any time. Use our managed service to:

- More effectively manage email retention without adding more resources
- Minimize business risk and satisfy compliance needs and reduce legal liabilities/litigation
- Incorporate business continuity with complete email backup protection
- Increase email security by preventing message tampering

## Technology made simpler for you and your team

You may have a full technical staff or you may have one dedicated person who handles all your systems support. Regardless of your business scope and size, our software as a service can relieve unnecessary technical pressures you face through:

- Flexible, rapid and accurate searching and saving through our intuitive user interface
- Unlimited, centralized off-site email storage
- Convenient off-site storage and rapid search and retrieval indexing for all historical email data, including online or offline transport options
- Parallel search technology that allows administrators to simultaneously view multiple search parameters and results
- A more effective way to manage and maintain MS® Outlook® Exchange databases
- Pull versus push message retrieval
- The elimination of hardware maintenance and support

## Don't waste another minute or another dollar on subpar archiving

the McAfee Message Archiving service not only offers data protection for employees and management, but supports industry retention and compliance regulations. You will also find value in our:

- Extremely attractive price point and no setup fees
- Easy implementation and administration through the MX control console, data exporting options and common email configuration
- 24x7 free, US-based customer support service
- Software as a Service model that requires no capital outlay
- Flexible contract terms; month-to-month programs
