

Simplify the management of your standard apps such as Exchange, File Services or SharePoint.

Software as a Service in the Cloud Benefits

- Applications on demand 24/7, pay as you go
- No need to have any hardware on-premise while improving productivity
- Transforming CAPEX to OPEX and reducing need for technical resources: moving business operations to the Cloud reduces TCO
- Pay per user per month with no start-up costs

Email

Exchange Mail

Take advantage of shared calendars, distribution lists, aliases, mobile Active-Synch, Outlook Anywhere, work offline

- Personal Exchange Mailbox (OWA only, 2 GB Mailbox)
- Small Business Exchange Mailbox (your own Outlook, OWA, Mobile Synch, 5 GB Mailbox)
- Corporate Exchange Mailbox (Outlook license, OWA, Mobile Synch, 10 GB Mailbox)
- Enterprise Exchange Mailbox (Outlook license, OWA, Mobile Synch, 25 GB Mailbox)

BlackBerry Synch

Use full synchronization of BlackBerrys with Exchange mailboxes. Other mobile devices use Active-Synch.

McAfee Anti-Spam, Email and Web Protection

Take advantage of the world's leading anti-spam provider by selecting one of our packages suited to your needs.

- Anti-Spam Protection
- Anti-Spam Protection with Business Continuity
- Anti-Spam Protection with Business Continuity and Web Protection
- Email Archiving

File Services

Use Nova's Cloud File Services to store and share files securely.

SharePoint: Collaboration Portal and Document Management

Focus on your business while we host or manage your SharePoint for document management and collaboration. There is no need for a complex and costly infrastructure by going to the Nova Cloud.

CRM/XRM

Manage contacts, organizations, sales pipelines, marketing, communications, services, cases, work or any other entities that you need to track. Build sophisticated workflows to automate processes all with an easy to use interface. CRM can be fully integrated into Outlook or as a stand-alone website. Work off line and synch with your Outlook and mobile device.

Virtual Desktops

Prolong the life of older equipment or use inexpensive thin client technology to provide your users with the latest desktop: Windows 7 from anywhere anytime.
