

NOVAcloud Servers can be quickly deployed or scaled for timely delivery of services to your employees or customers.

## Benefits

- On-demand, resource pooling, measured, elastic, broad access, private, public, hybrid, no hardware required
- Lower TCO with more reliability and availability resulting in higher productivity
- Avoid CAPEX and complexity

## Server Packages

- Introduction Server (1 CPU, 4 GB RAM, 80 GB Storage)
- Standard Server (1 CPU, 8 GB RAM, 120 GB Storage)
- Professional Server (1 CPU, 16 GB RAM, 240 GB Storage)
- Corporate Server (2 CPU, 24 GB RAM, 320 GB Storage)
- Enterprise Server (2 CPU, 48 GB RAM, 560 GB Storage)
- Custom (Build your own cloud server)

## Cloud Server Additional Options

### Extra Storage

- |          |          |
|----------|----------|
| ▪ 200 GB | ▪ 500 GB |
| ▪ 1 TB   | ▪ 1.5 TB |
| ▪ 2 TB   | ▪ 3 TB   |
| ▪ 4 TB   | ▪ 5+ TB  |

Ask about Premium storage for high performance databases.

### Bandwidth

- |                         |                        |
|-------------------------|------------------------|
| ▪ 1 Mbps 30 GB/month    | ▪ 2 Mbps 50 GB/month   |
| ▪ 3 Mbps 80 GB/month    | ▪ 5 Mbps 120 GB/month  |
| ▪ 7 Mbps 160 GB/month   | ▪ 10 Mbps 200 GB/month |
| ▪ 15+ Mbps 300 GB/month | ▪ Other                |

### OS (1 License per server)

- Windows Web Server 2008 R2
- Windows Standard Server 2008 R2
- Windows Enterprise Server 2008 R2
- Linux Server OS

### Backup

- |          |          |
|----------|----------|
| ▪ 20 GB  | ▪ 50 GB  |
| ▪ 100 GB | ▪ 200 GB |
| ▪ 500 GB | ▪ 1+ TB  |

### Public IPs

- 1
- 2-5
- 10+

## Included Free

All NOVAcloud Servers come with free 24/7 monitoring and availability guarantees. 1 VPN is included. Our cloud is in top tier data centres in Canada.

## Integration with Other Clouds or On-Premise

Let Nova's expertise help you securely integrate your cloud servers with your own corporate or other data centre infrastructure. We can also help you tie into other cloud solutions.

## Other Services

- Additional VPNs
- Additional High Availability and Load Balancing
- Acceleration for WAN Optimization
- Additional Firewall and Security
- Anti-Virus and Anti-Spam Protection
- Managed Services Packages
