

Nova offers a complete suite of enterprise-grade email and web protection services by partnering with award-winning McAfee® and its cost-effective robust hosted solutions.

Protect Your Organization

Nova Networks' hosted security solutions provide world-class quality in protection without the need for any start-up costs and complex administration. Nova has partnered with McAfee, a world leader in email and web protection. The services can be broken down into the following categories:

Email Protection

Protect yourself against spam, viruses, worms, phishing, spyware and other malicious threats that arrive at your door via email through one of the world's most sophisticated solutions McAfee. With 20 layers of filters, advanced intelligence built-in, and multi-sites for maximum reliability, high prevention is maintained 24/7. Combine this with advanced features such as easy administration, quarantine fine-tuning, intelligent routing, outbound email filtering, and message continuity (even if your mail server fails) and a suite of trend threat analysis and usage reporting. All of these services are provided on a fee per mailbox and no start-up costs.

Web Protection

Our web security solution provides easy-to-deploy web filtering and web monitoring. Web filtering protects users from web sites or web mail with embedded spyware, viruses and other malware or phishing attacks. The web monitoring can be used to monitor employee web usage or restrict access to web sites based on content. Per user fees and no start-up costs make this an attractive package.

Message Archiving

Unlimited storage, rich search, definable retention periods, regulatory and workplace compliance backed up by 24/7 support provides a robust solution without any start-up costs or maintenance requirements.

These can be purchased in bundles or individual components can be custom packaged to meet your specific needs.

Hosted Solution Benefits

- Ease of management via our unified administrative portal
- Increase employee productivity and reduce business disruption
- Eliminate online security capital expenditures
- Reduce IT labour costs, complexities and risks associated with in-house email threat management
- Focus on your core business
- Filtering in the cloud keeps threats far away from your network reducing bandwidth consumption
- Updates are automatic and continuous
- Call Nova support 24/7 with immediate attention
