

Even files can be saved and worked on in the cloud. For collaboration and true document management consider SharePoint in the cloud.

File Services

Nova's Cloud File Services allow an organization to save, edit and organize files and folders as if they were on desktops or traditional on-premise servers. Using mapped drive and standard access permissions, users can expect better reliability and availability.

In addition, backups are taken care of by Nova.

SharePoint Collaboration and Document Management

Microsoft SharePoint is the world's leading portal/intranet solution for collaboration and document management.

Implement it for your organization without having the initial expense and avoid the complexity of managing SharePoint to allow you to focus on your business.
